

Environmental policy

Environmental policy of KOMPAN is based on environmental considerations, forming an integral part of the Management's decisions. The scope of KOMPAN is manufacturing of outdoor playground equipment.

KOMPAN is committed to continuous improvements of its environmental profile and prevention of environment pollution

- *Continuous improvements within the quality and environmental areas is part of the activities in all departments. The employees are involved actively in the improvement activities as part of the company's and the employees' development.*
- *The employees are constantly encouraged to take part in the quality and environmental control.*

KOMPAN is committed to fulfill valid relevant law requirements and other requirements linked to environment protection to which it is committed and which are linked to environmental aspects.

- *KOMPAN always tries to replace non-certified FSC wood with certified FSC wood, and exclude suppliers who deliver materials with a large probability of using controversial wood for the production.*
- *Consequently, KOMPAN products are manufactured from materials and by technologies which have a minimum impact on the environment. Materials used by the company are environmentally evaluated before they are accepted. The company constantly aims at meeting customer and society demands for anti-polluting products.*
- *KOMPAN is prepared - also externally - to contribute to the development of environmentally justifiable technologies, materials, management procedures and behaviour.*
- *KOMPAN constantly supervises that the surroundings are not inappropriately influenced by the activities of the company, external companies are subjected to the same rules as the company's employees.*

KOMPAN as a part of continuous improvement, sets and reviews environmental objectives and targets.

- *KOMPAN continuously carries through quality and environmental audits of the quality and environmental control system. By subsequent evaluations the company ensures that environmental policies and goals are improved and adapted to society's demands.*
- *KOMPAN A/S continuously tries to minimise and make the consumption of resources more efficient, by actively encouraging employees who are informed of the company's environmental impact through information and training.*
